

The Blueprint (Wireframing)

Low-Fidelity Homepage Wireframe for an E-commerce Website

UI/UX PROJECT-1

Presented by:

Vennela Sakalabatthula

Internship Program:

DecodeLabs UI/UX Internship 2026

Problem Statement:

Busy users are abandoning the checkout process due to a cluttered and confusing e-commerce interface. The lack of clear navigation and visual hierarchy makes it difficult for users to complete their purchases.

Objective:

To create a clean and user-friendly homepage wireframe that improves navigation, highlights key actions, and guides users smoothly through the shopping journey.

Key Focus Areas:

- Clear Navigation
 - Logical Information Hierarchy
 - Easy Product Discovery
 - Prominent Call-to-Action (CTA) Buttons
 - Improved User Flow
-
